WELCOME

Message from the Managing Director

A management system should make an organisation safer, more secure and more sustainable, not simply help it pass an audit.

That conviction has guided AEC since 2007. It has taken us from our first engagements in Europe and Pakistan to more than 750 engagements in over 15 countries, for national champions and global multinationals alike, from power plants and steel mills to medical device makers and technology leaders.

The standards your organisation relies on are changing. ISO 9001 and ISO 14001 were both revised in 2015, AI governance has arrived with ISO/IEC 42001, and organisations face growing expectations on climate reporting, information security and compliance. Our role is to turn that complexity into systems people can actually use.

What has not changed is how we work: senior, registered auditors on every engagement, honest advice, and complete independence from the certification decision. We prepare our clients thoroughly, and we never promise a certification outcome; that decision belongs to an independent certification body.

Thank you for considering AEC International. We look forward to building systems with you that work in practice and stand up to any audit.

Barrister Dr. Syed Wasif Ali Shah

OUR VALUES

Safety

Protecting people, sites and communities in everything we help clients build.

Security

Safeguarding information, assets and trust in a connected world.

Sustainability

Systems that reduce impact and endure long after the audit.

WHO WE ARE

AEC at a Glance

AEC International (Audits, Evaluation & Certification) helps organisations build, implement and sustain management systems that stand up to independent audit and deliver measurable business value.

Headquartered in Philadelphia, with offices in The Hague, Marseille and Islamabad and representation across the Gulf, we act as a single partner from gap assessment and implementation through training, internal audit and certification readiness. Certification is delivered through UKAS- and DAkkS-accredited certification bodies such as SGS, TÜV and BSI, selected to fit each client's market, customer requirements and budget.

WHAT WE DO

Our Services

Four integrated service lines, delivered by registered lead auditors and senior consultants. Clients can engage us for a single service or as one partner across the full journey, from first gap assessment to certification and beyond.

01 Consultancy

Practical, risk-based implementation tailored to how your organisation actually operates, never off-the-shelf templates.

- Gap assessment and readiness review
- Context, risk and opportunity analysis
- Policies, procedures and records design
- Process implementation and on-site coaching
- Integrated management systems (IMS)

02 Certification Support

Certification through UKAS- and DAKKS-accredited bodies, matched to your market, customer requirements and budget.

- Certification body selection and application
- Pre-assessment and mock audits
- Stage 1 and Stage 2 audit support
- Nonconformity response and corrective action
- Surveillance and recertification readiness

03 Training Academy

As a CQI/IRCA Approved Training Partner, we deliver courses from awareness to certified lead auditor, in-house, public or virtual.

- Awareness: half-day overview
- Implementer: 2 to 3 days, hands-on
- Internal Auditor: based on ISO 19011
- Lead Auditor: CQI/IRCA certified, 5 days
- In-person, virtual and hybrid delivery

04 Ongoing Partnership

Post-certification support that keeps your system effective, current and improving long after the certificate is issued.

- Outsourced internal audit programmes
- Management review and KPI support
- Transitions to ISO 9001:2026 and ISO 14001:2026
- Adding standards to an existing system
- Supplier and second-party audits

One partner, gap to certificate

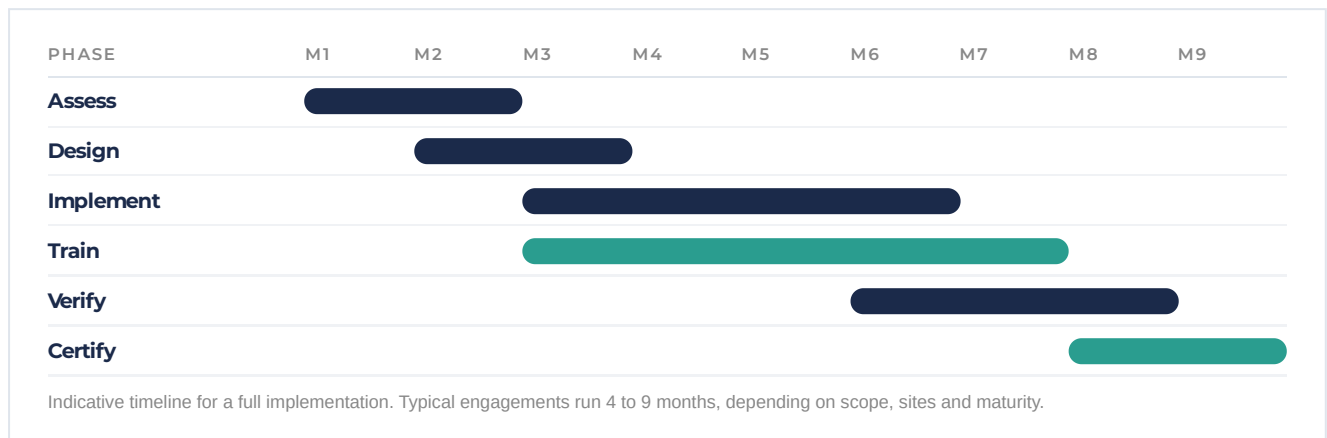

Typical engagement: 4 to 9 months, depending on scope and maturity

HOW WE WORK

Our Methodology

A proven, six-phase approach that takes organisations from first assessment to certification, and keeps the system working long after the audit.

PHASE 01

Assess

Gap assessment against the standard, context and scope definition, and a prioritised roadmap agreed with leadership.

KEY DELIVERABLES

Gap report, scope, roadmap

PHASE 02

Design

Policies, processes, risk and opportunity registers and documented information, designed around how you really operate.

KEY DELIVERABLES

Policies, procedures, risk register

PHASE 03

Implement

Processes embedded on the ground, with coaching for process owners and records that prove the system works.

KEY DELIVERABLES

Live processes, records, KPIs

PHASE 04

Train

Awareness for all staff, role-specific training and internal auditor development, so competence stays in-house.

KEY DELIVERABLES

Trained teams, internal auditors

PHASE 05

Verify

Internal audit, management review and a mock certification audit, with corrective actions closed before the real audit.

KEY DELIVERABLES

Audit reports, management review

PHASE 06

Certify & Sustain

Stage 1 and Stage 2 support with an accredited body, then surveillance readiness and continual improvement.

KEY DELIVERABLES

Certification, surveillance support

ENGAGEMENT MODELS BY STARTING POINT

Greenfield

Full implementation

No existing system. We design and implement from the ground up. Typically 6 to 9 months.

Basic systems

Gap remediation

Some documentation in place. We close the gaps and prove effectiveness. Typically 4 to 6 months.

Already certified

Integration & upgrade

Adding standards, integrating systems or transitioning to new editions. Typically 3 to 5 months.

STANDARDS PORTFOLIO

Standards We Deliver

46 standards and schemes, from established quality, environmental and safety systems to emerging AI governance, delivered individually or as one integrated management system.

CORE SPECIALISMS

Current editions

ISO/IEC
42001
:2023

AI Management System
Responsible, governed AI

ISO/IEC
27001
:2022

Information Security
Protecting information assets

ISO
45001
:2018

Occupational Health & Safety
Safe, healthy workplaces

ISO
14001

Quality Management
Consistent, customer-focused delivery

Certification Support

35 standards and schemes, including the five core specialisms

SECTOR QUALITY & PRODUCT

AS9100 Aerospace
AS9110 Aerospace MRO
AS9120 Aerospace distribution
IATF 16949 Automotive
ISO 13485 Medical devices
ISO 22163 Railway (IRIS)
ISO 29001 Oil & gas
ISO 19443 Nuclear sector
CE Marking* EU product conformity

ENERGY, CLIMATE & SAFETY

ISO 50001 Energy management
ISO 14064-1† GHG quantification
ISO 46001 Water efficiency
ISO 20121 Event sustainability
ISO 39001 Road traffic safety

FOOD SAFETY

ISO 22000 Food safety management
FSSC 22000 GFSI food safety scheme
HACCP Codex hazard analysis

ASSETS & RECORDS

ISO 55001 Asset management
ISO 41001 Facility management
ISO 30301 Records management
ISO 44001 Collaborative relationships

DIGITAL & RESILIENCE

ISO/IEC 27701 Privacy information
ISO/IEC 20000-1 IT service management
ISO 22301 Business continuity
ISO 28000 Supply chain security

GOVERNANCE & SOCIAL

ISO 37001 Anti-bribery
ISO 37301 Compliance management
ISO 18788 Security operations
ISO 30000 Ship recycling
SA8000‡ Social accountability

Accreditation Readiness

Accreditation by a national accreditation body, not certification

ISO/IEC 17025 Testing & calibration
ISO 15189 Medical laboratories
ISO/IEC 17020 Inspection bodies
ISO/IEC 17065 Product cert. bodies

Implementation & Guidance

Implemented, trained or audited as extensions; not certified on their own

ISO/IEC 27017 Cloud security, 27001 ext.
ISO/IEC 27018 Cloud PII, 27001 ext.
ISO/IEC 27019 Energy utilities, 27001 ext.
ISO/IEC 27032 Cybersecurity
ISO 37002 Whistleblowing
ISO 31000 Risk management
ISO/IEC 29151 PII protection

Who certifies

Certification by independent, UKAS- or DAKKS-accredited certification bodies, except:

* CE Marking: EU notified bodies, where the regulation requires third-party assessment

† ISO 14064-1: verification to ISO 14064-3 by an independent verification body

‡ SA8000: SAAS-accredited certification bodies

INDUSTRIES SERVED

Sector Expertise

Every sector carries its own risks, regulations and audit expectations. Our lead auditors bring hands-on industry experience, so systems fit how your operations really work.

Energy & Utilities

Safety-critical operations, asset integrity and environmental compliance.

ISO 45001 ISO 14001 ISO 55001

SELECTED CLIENTS Uch Power, EDF, Engie, NextEra Energy, Eneco

Chemicals & Industrial Gases

Process safety, emissions control and integrated QHSE systems for complex, regulated sites.

ISO 14001 ISO 45001 ISO 28000

SELECTED CLIENTS BASF, Dow, AkzoNobel, Air Liquide, Linde, Borouge

Manufacturing & Materials

Consistent product quality, energy efficiency and worker safety on high-volume production lines.

ISO 9001 IATF 16949 ISO 50001

SELECTED CLIENTS Amreli Steels, Cemex, Lafarge, Vicat, DuPont

Food, FMCG & Retail

Food safety, traceability from farm to fork and consistency across multi-site operations.

ISO 22000 HACCP ISO 9001

SELECTED CLIENTS Nestlé, Unilever, Almarai, Baladna, Heineken, Carrefour

Technology & Telecom

Information security, privacy, service resilience and responsible AI governance.

ISO/IEC 27001 ISO/IEC 42001 ISO 22301

SELECTED CLIENTS ASML, Capgemini, Atos, Ooredoo, Adyen

Healthcare & Life Sciences

Regulatory alignment, patient data protection and laboratory competence.

ISO 13485 ISO/IEC 17025 ISO 9001

SELECTED CLIENTS Sanofi, Merck KGaA, Ipsen, Pharming, DSM

Construction & Engineering

Site safety, subcontractor control and quality across multiple concurrent projects.

ISO 9001 ISO 14001 ISO 45001 IMS

SELECTED CLIENTS Cementbouw, Eagle Materials, ECL Constructions

Government & Maritime

Accountability, information security and continuity of critical public services.

ISO/IEC 27001 ISO 37001 ISO 22301

SELECTED CLIENTS SUPARCO, Bahria Classification Society

Cross-sector insight, sector-specific delivery.

Lessons from energy, food, technology and the public sector inform every engagement, while each system is tailored to your own risks, regulators and customers.

OUR TEAM

Leadership & Expertise

AEC is led by practitioners, not just managers. Every engagement is directed by senior people who have spent decades inside the systems they now help clients build.

LEADERSHIP

MAJOR
NCS

13

SITES

THE CHALLENGE

Bringing 13 sites under one medical-device quality system: controlling demanding records (design files, purchasing, complaints and CAPA), qualifying and monitoring suppliers across a complex supply chain, and keeping practices consistent site to site.

WHAT AEC DID

- Multi-site gap assessment
- Harmonised QMS documentation and records
- Design, purchasing, complaints and CAPA processes
- Supplier qualification and monitoring
- Risk management across product realisation
- Site training and internal auditor development
- Multi-site internal audits and management review
- Certification audit support

THE RESULT

Certified at first attempt, no major nonconformities. ISO 13485 opened access to medical device makers, who require certified suppliers. Earlier, FSSC 22000 at Pleasant Prairie, WI gave the site GFSI-recognised certification to supply food-contact packaging to major food brands.

ENERGY · MULTIPLE US STATES

NextEra Energy Resources

ISO 14064-1 / 14064-3 · 2023 · 12 months · Multiple sites

CHALLENGE

Producing a complete, verification-ready greenhouse gas inventory across a large, multi-state generation portfolio.

WHAT AEC DID

Developed the GHG inventory, boundaries, methodologies and data controls to ISO 14064-1, with verification-ready documentation for an independent verifier.

Verified first time to ISO 14064-3, with no findings. Supports Real Zero reporting, CDP disclosure and readiness for California climate disclosure rules.

CHEMICALS & MATERIALS · USA & BRAZIL

Dow

ISO/IEC 27001 Midland, MI · 2023 · 6 mo

ISO 9001:2015 Dow Consumer Solutions · 2018 · 3 mo

IATF 16949:2016 Pindamonhangaba, Brazil · 2017 · 4 mo

CHALLENGE

Three different systems, three sites and three regulatory contexts, from information security at headquarters to automotive quality in Brazil.

WHAT AEC DID

Information security for Midland headquarters operations; quality management for consumer solutions; IATF system for glass and plastic bonding systems (product design excluded).

All three certified at first attempt, no nonconformities. A relationship since 2017, across two continents.

ALSO IN THE AMERICAS Cemex · Eagle Materials · McDonald's

CASE STUDIES · EUROPE

Proven Results in Europe

From multi-country energy certification to food-grade industrial gases, delivering across Europe since 2007.

ATTEMPT

0

NCS

9

COUNTRIES

THE CHALLENGE

One energy management system across offices in Belgium, France, Germany, Ireland, Italy, Luxembourg, Poland, the Netherlands and the UK, each with different energy sources, metering and local practices.

WHAT AEC DID

- Multi-country energy review
- Significant energy uses identified
- Energy baseline and performance indicators
- Harmonised procedures across nine countries
- Energy team and awareness training
- Multi-site internal audits
- Management review support
- Certification audit support

THE RESULT

Certified at first attempt, no nonconformities. One ISO 50001 certificate covering sites in Paris, Utrecht, London, Rome, Warsaw, Berlin, Dublin, Machelen and Bertrange. The relationship began in 2007 with ISO 9001 for Altran Spain (now Capgemini Engineering) at Madrid, La Rinconada and Vitoria.

INDUSTRIAL GASES · UNITED KINGDOM

Air Liquide UK

FSSC 22000 v6 · 2025 · 4 months · Wissington, King's Lynn

CHALLENGE

Applying food safety controls to industrial gas production: purified, liquefied CO₂ despatched in bulk as a food ingredient and processing aid.

WHAT AEC DID

Hazard analysis for bulk CO₂, prerequisite programmes to ISO/TS 22002-1, FSSC v6 additional requirements including food defence, food fraud and food safety culture, training and mock audit.

Certified at first attempt, no nonconformities.
Food chain category K, production of bio/chemicals.

COATINGS · GERMANY

AkzoNobel Powder Coatings

ISO 9001:2015 & ISO 14001:2015 · 2024 · 6 months each · Leipzig

CHALLENGE

Two separate projects building quality and environmental systems for the development, production and distribution of coating materials and pigment preparations.

WHAT AEC DID

Gap assessments, process and environmental aspect reviews, documentation, legal register, training, internal audits and certification support for each standard.

Both certified at first attempt, no nonconformities.

ALSO IN EUROPE

ASML ISO 14001:2004, Veldhoven, 2007 · **Multibase** (Dow) ISO 50001:2018, France, 2024 · **Schramm Coatings** ISO 50001:2018, Offenbach, 2021 · **DSM Materials Science Center** ISO 9001:2015, Geleen, 2020

MAJOR
NCS

3

STANDARDS

THE CHALLENGE

Integrating two combined-cycle plants into one quality, environmental and safety system at a remote, safety-critical site, without disrupting round-the-clock generation, while aligning established working practices and defining clear process ownership.

WHAT AEC DID

- Gap assessment against all three standards
- Integrated IMS documentation, policies and SOPs
- Legal and regulatory compliance register
- Hazard and environmental aspect assessments
- Awareness and internal auditor training
- Internal audit and management review
- Mock certification audit
- Support through certification and NC closure

THE RESULT

Certified at first attempt, no major nonconformities. One integrated management system now covers power generation, operation and maintenance across both plants, with a single policy, risk register and audit programme.

MANUFACTURING · KARACHI

Amreli Steels

ISO 9001:2015 · 2022 · 4 months · Sher Shah site

CHALLENGE

Making quality controls consistent across high-volume rebar production, so every batch reliably meets BS 4449 and ASTM A615 product requirements.

WHAT AEC DID

Gap assessment, process and inspection controls linked to product specifications, procedure development, awareness and internal auditor training, internal and mock audits.

Certified at first attempt, no major nonconformities. Quality system covering Xtreme high-strength bars (BS 4449) and hot-rolled deformed bars (ASTM A615/A615M).

GOVERNMENT & RESEARCH · KARACHI

SUPARCO

ISO 14001 · Partner since 2018 · 3 months per cycle

CHALLENGE

Building and sustaining an environmental management system around laboratory testing operations that serve both research and commercial clients.

WHAT AEC DID

Laboratory-specific environmental aspects and impacts, legal register, procedures, training and internal audit, renewed through repeat engagements every two years.

Certified at first attempt, no major nonconformities. Long-term partner, with repeat engagements in 2018, 2020, 2022, 2024 and 2026.

ALSO IN PAKISTAN

Adamjee Engineering ISO 9001 & ISO 14001, fasteners and powder-metal parts · plus engagements for Unilever, Nestlé, BASF, Merck KGaA and Linde.

TRAINING ACADEMY

Building Lasting Competence

In-house

Delivered at your site, tailored to your processes and risks.

Public courses

Scheduled open courses for individuals and small teams.

Virtual & hybrid

Live online delivery across time zones, or blended formats.

Assessment

Exercises, case studies and certificates of achievement.

WHY TRAIN WITH AEC

Practitioner trainers

Every trainer is a registered lead auditor who audits in the field, not just in the classroom.

Real-world cases

Exercises drawn from energy, manufacturing, food, technology and public-sector audits.

Recognised credentials

CQI/IRCA certified lead auditor courses, recognised by employers and certification bodies worldwide.

WHY AEC

The AEC Difference

Clients choose AEC for systems that work in practice and stand up to independent audit, delivered by senior specialists with no conflict of interest in the outcome.

01

CB-Neutral by Design

We are not tied to one certification body. We match you with the right UKAS- or DAkkS-accredited body, such as SGS, TÜV or BSI, for your market, customers and budget.

02

Senior-Led Delivery

Registered principal and lead auditors run every engagement personally. You work with the experts you meet, not a junior team.

03

CQI/IRCA Approved Training Partner

Certified lead auditor courses and practical in-house training that build lasting internal capability, not dependence on consultants.

04

Integrated Systems, Less Duplication

One policy, one risk register and one audit programme across quality, environment, safety and security, saving time and audit days.

05

International Reach, Local Knowledge

Offices in the USA, Netherlands, France and Pakistan, with representation in KSA, UAE and Qatar, under one methodology.

06

Ready for What Is Next

Early expertise in ISO/IEC 42001 for AI governance, and practical support for the 2026 transitions of ISO 9001 and ISO 14001.

Impartiality & Integrity

Independent certification

Certification decisions are made by independent, accredited certification bodies, never by the consultants who helped implement your system.

CB-neutral

AEC is not tied to one certification body. We recommend the accredited body that best fits your market, customers and budget.

Readiness, not guarantees

We prepare you thoroughly for certification. We never promise an outcome that only an independent auditor can decide.

HOW WE PROTECT YOUR CERTIFICATION

AUDIT PRINCIPLES

Integrity

Fair presentation

Due professional care

Confidentiality

Independence

Evidence-based

Risk-based

Every AEC auditor works to the principles of ISO 19011, the international guideline for auditing management systems. All client information is handled under strict confidentiality.

INTERNATIONAL

Systems that work. Audits you can trust.

Talk to us about certification readiness, implementation, integrated management systems or training for your teams.
